

Call Forwarding No Answer allows you to forward all your calls to a different phone number when you do not answer your phone. Use this service when you would rather have your cell phone, a secretary or co-worker receive the call **instead** of the caller being sent to your voice messaging box if you miss a call.

Log into Broadsoft as a **user**

From the Options Menu

- Select **Incoming Calls**
- Then select **Call Forwarding (Always / Busy / No Answer)**
- Call Forwarding No Answer radio button to ON
- Enter the phone number into “Calls Forward to:”
- **Apply**
- **OK**

The screenshot shows a web interface for configuring call forwarding. On the left is a navigation menu with the following options: Profile, **Incoming Calls** (selected), Outgoing Calls, Call Control, Messaging, and Utilities. The main content area is titled "Call Forwarding No Answer" and includes a descriptive paragraph: "Call Forwarding No Answer allows you to forward all your calls to a different phone number when you do not answer your phone. Use this service when you would rather have a secretary or co-worker receive the call instead of the caller being sent to your voice messaging box if you miss a call." Below this text are two sets of buttons: "OK", "Apply", and "Cancel". The configuration options are: "Call Forwarding No Answer:" with radio buttons for "On" (selected) and "Off"; "\* Calls Forward to:" with a text input field containing "3105551212"; and "Number of rings before forwarding:" with radio buttons for "2", "3" (selected), "4", "5", and "6". A second set of "OK", "Apply", and "Cancel" buttons is located at the bottom of the configuration area.
